BRACKET LAYOUT

BS0003c

1. Determine the location of the awning.

**NOTICE** For proper operation of the awning, the brackets must be placed under the arm knuckles. If necessary to position the brackets differently than shown, use the knuckle positions shown in the installation manual.

2. Position the brackets on the roof as shown above.
  - 2.1. Use a non-permanent marking method and make a reference line to keep the brackets aligned.
  - 2.2. On the roof mark the location of the square mounting holes in the brackets. Set brackets aside.
3. Drill four 3/8" (10mm) holes through the roof for each bracket.
4. Coat the bottom of the bracket flanges with a quality urethane or hybrid sealant.
5. Secure each bracket with four (4) each M6 x 50mm carriage bolts, spacers and nylock nuts through the bracket and two (2) underside plates.
6. In the rear track of the mounting brackets, start four (4) M6 x 20 screws and square nuts through the retaining screw holes. Do not tighten at this time.
7. Mount the awning according to the installation manual for the awning.
