

COMPASS

Motorized Adjustable Pitch Vertical Arm Patio Awning

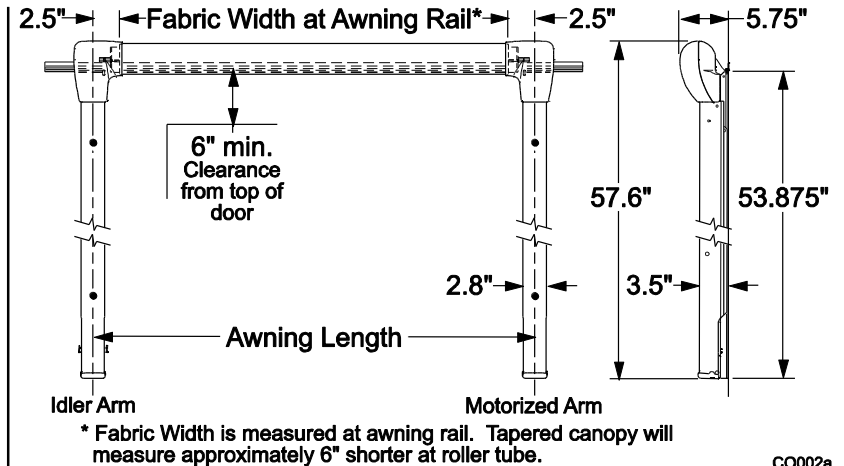

- The unique "scissor" style arms eliminate the need for vertical ground supports.
- Worm gear style motor is billow proof - eliminates the need for travel locks.
- The shorter mounting height (54" below awning rail) fits standard installations and most 5th wheel gooseneck applications.
- Easy to use 6 position pitch adjustment. Pitch can be set with the awning open or closed.
- Streamlined installation: 1) Roller tube attaches to the arms with snap rings installed in the heads. 2) Outer channels are predrilled for initial mounting screws.
- LED Options: Available in white or RGB (color). LED's can be mounted in the roller tube or at the awning rail.

SPECIFICATIONS

For specific installation information, refer to the product documentation available on-line at www.carefreeofcolorado.com

CO002a
